

LCA and Ecodesign to promote eco-innovation

Mikolaj Owsianiak, Technical University of Denmark, Denmark

David Cockburn, Tetra Pak, Sweden

LCA and Ecodesign are two instruments applied in order to promote eco-innovation at the level of products, processes and services aiming on a reduction of the environmental impacts arising during the whole life-cycle. The scope of this session is to demonstrate the specific characteristics of LCA and of Ecodesign both elaborating the theoretical framework and describing case studies of industrial interest.
