

## **Translating Life Cycle Thinking / LCA results into communications**

*Marie Ticha*, University of J. E. Purkyně in Ústí nad Labem, Czech Republic

*Janko Hodolič*, University of Novi Sad, Serbia

LCA is increasingly used as basis to communicate the overall environmental performance of the products to customers and/or consumers. This session offers a platform for discussing the issues that are relevant when using LCA results in external communication related to sustainability reporting, with special emphasis on LCA based environmental product declarations (EPD). Submissions connected to eco-efficiency assessment are welcome as well.
